

Working Women Award London

Individual Excellence Award

Women in Construction / Engineering Excellence Award

OVERVIEW

The Women in Construction / Engineering Excellence Award celebrates trailblazing women making outstanding contributions in construction, civil engineering, architecture, infrastructure, or related technical fields. This category recognises female professionals who are breaking barriers in traditionally male-dominated industries and driving innovation, sustainability, and quality in engineering and construction projects.

ELIGIBILITY

- Open to women-identifying professionals in construction, civil, structural, mechanical, or related engineering disciplines
- Includes engineers, architects, project managers, builders, site leads, and ..

QUALITATIVE CRITERIA

- Pioneering achievements on major infrastructure or urban development projects
- Use of smart technologies or green building practices
- Advocating for diversity or mentoring women in engineering
- Contributions to industry standards or technical education

METRICS
